CAREER OBJECTIVE

Detail-oriented and motivated Full Stack Developer with a strong foundation in problem-solving and analytical skills. Seeking to contribute to a dynamic organization as a Full Stack Developer. Passionate about building scalable web applications and committed to continuous learning and innovation in emerging technologies.

EDUCATION

B.Tech (2019 – 2023) – Aditya Institute of Technology and Management, Tekkali | CGPA: 7.23

Intermediate (2017 – 2019) – Aditya Junior College, Haripuram | CGPA: 7.42

SSC (2016 – 2017) – Vivekananda Vidya Niketan High School, Mandasa | CGPA: 8.2

TECHNICAL SKILLS

Programming Languages: PHP, Java

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap

Frameworks: Laravel, Spring Boot, Spring Data JPA, REST APIs

Database: MySQL, Eloquent ORM

Tools: VS Code, PhpStorm, Git, Composer, Artisan CLI

Deployment: Hostinger

CERTIFICATIONS

- Front-End Development Course – Great Learning Academy

- Java Full Stack Developer Training – 360Digrii (Java, HTML, CSS, JavaScript, SQL, Spring Boot)

WORK EXPERIENCE

Full Stack Developer – JippyMart (Startup, Foundation Level) | Ongole, India

March 2025 – Present

- Built and deployed end-to-end web applications using Laravel (MVC architecture).
- Developed RESTful APIs, managed routes, controllers, and Eloquent ORM for CRUD operations.
- Created authentication, role-based access, and encryption/decryption systems.
- Managed database migrations, seeding, and schema design using Artisan CLI and MySQL.
- Designed responsive interfaces using Blade, Bootstrap, and AJAX/jQuery.
- Integrated third-party services via Composer packages.
- Deployed applications on Hostinger and cloud platforms.
- Collaborated from the startup foundation stage on architecture, Git versioning, and documentation.

PROJECTS

JippyMart – Food Delivery Platform

- Developed and maintained backend services for a food delivery platform, including restaurant management, product listings, user orders, and delivery workflows.

- Built RESTful APIs for customers, restaurants, delivery partners, and admin operations, ensuring reliable and scalable communication across the platform.
- Implemented authentication, authorization, and session handling for customers, admins, and delivery partners using Laravel's built-in auth system.
- Designed and managed database schemas for restaurants, items, carts, orders, addresses, and transactions using Laravel Migrations and Eloquent ORM.
- Created cart management, checkout flow, and order-tracking logic (order placement → order confirmation → preparation → dispatch → delivered).
- Integrated payment gateway APIs and third-party services required for transactions and order notifications.
- Optimized API performance, reduced database overhead, and improved query speeds using Eloquent relationships and indexing.
- Built admin panel modules for managing restaurants, menus, pricing, offers, orders, and user activities.
- Deployed the backend to Hostinger and configured environment variables, SSL, storage links, and queue jobs.
- Collaborated with the frontend/mobile team to ensure seamless API integration and accurate data flow across the platform.

Bank Aggregator Application

Technologies: Spring Boot, Spring Data JPA, SQL, AWS S3 | Year: 2025

- Developed an application to integrate multiple banking services and generate summarized statements.
- Implemented RESTful APIs and AWS S3 for uploading/downloading statements.
- Converted downloaded statements into Java objects and persisted them in the database.
- Secured user access with Spring Security and role-based authorization.

STRENGTHS

- Strong problem-solving and logical thinking skills
- Excellent communication and teamwork
- Quick learner and adaptable to new technologies

DECLARATION

I hereby declare that the above-mentioned information is true and correct to the best of my knowledge.
